Main Unwind Requirements

Substrates:

Web Width	(Max.): _____	(Min.): _____
------------------	----------------------	----------------------

Tension	(Max.): _____	(Min.): _____
----------------	----------------------	----------------------

Roll OD: _____	Roll Weight (Max.): _____
-----------------------	----------------------------------

Core ID: _____	Core Width: _____
-----------------------	--------------------------

Is automatic unwind splicing required? Yes No

Type of splice required?

Butt Splice Lap Splice Other (describe): _____

Shafted or Shaftless: _____

Preferred Unwind Configuration?

Single position Two Position Two Position Turret Other _____

How will material be delivered to machine and mounted?

Does the material require any type of treating or cleaning prior to being processed? If so, explain:

916.379.8200
Fax 916.379.8201
www.conquipinc.com

Laminator Requirements

Is there a requirement for a laminator? Yes No

Nip Force: _____ pli (lb./lineal inch)

Nip Roller Material: _____ Durometer: _____ Shore A

Does the laminator require heating? Yes No Temp: _____

Other laminator requirements: _____

Laminate Unwind Requirements

Substrates: _____

Web Width (Max.): _____	(Min.): _____
-------------------------	---------------

Tension (Max.): _____	(Min.): _____
-----------------------	---------------

Roll OD: _____	Roll Weight (Max.): _____
----------------	---------------------------

Core ID: _____	Core Width: _____
----------------	-------------------

Is automatic unwind splicing required? Yes No

Type of splice required?

Butt Splice Lap Splice Other (describe): _____

Shafted or Shaftless:

Preferred Unwind Configuration?

Single position Two Position Two Position Turret Other _____

How will material be delivered to machine and mounted? _____

Does the material require any type of treating or cleaning prior to being processed? If so, explain:

Interleaf Unwind Requirements

Substrates:

Web Width (Max.): _____

(Min.): _____

Tension (Max.): _____

(Min.): _____

Roll OD: _____

Roll Weight (Max.): _____

Core ID: _____

Core Width: _____

Is automatic unwind splicing required?

Yes No

Type of splice required?

Butt Splice Lap Splice Other (describe): _____

Shafted or Shaftless: _____

Preferred Unwind Configuration?

Single position Two Position Two Position Turret Other _____

How will material be delivered to machine and mounted? _____

Does the material require any type of treating or cleaning prior to being processed? If so, explain:
